

We protect and beautify the world™

INTRODUCTION

PPG operates as a key contributor to Malaysia's coatings and materials industry. PPG Malaysia supports major sectors such as automotive, industrial manufacturing, marine, packaging and architectural development. PPG Malaysia plays a strategic role in enhancing the nation's industrial competitiveness while supporting long-term economic growth.

REFLECTION

This talk reshaped our view of ICT careers, showing us it's not just about coding, but about solving real business problems.

The key insight was seeing how ICT directly tackles core industrial challenges. Through enterprise-wide systems like SAP S/4HANA, ICT standardizes and streamlines global operations, turning complexity into efficiency. By building data lakes and analytics platforms, they solve the critical business problem of fragmented information, enabling data-driven decisions that affect the entire supply chain.

This new perspective gives our studies deeper meaning. We're no longer just learning programming, but learning how to build the digital backbone that allows a global company to operate, compete and fulfill its sustainability commitments. We've learned that the most rewarding tech careers are measured not by lines of code written, but by real problems solved and positive change created.

PPG INDUSTRY TALK

20 November 2025

KEY ISSUES DISCUSSED IN THE TALK

• Digital Transformation

Instead of each office using different systems, PPG is implementing a unified SAP platform that helps teams across 70+ countries work seamlessly together.

• Cloud Strategy

Their smart use of multiple cloud platforms such as AWS, Azure and Alibaba Cloud means PPG employees can collaborate effectively, whether they're in Malaysia, the US or anywhere else.

• Process Optimization

The technology solutions PPG is building, like their Supply Chain Control Tower enhance visibility and efficiency across complex business operations.

EXECUTIVE SUMMARY

This career talk showcased PPG's comprehensive digital transformation, highlighting how ICT professionals drive innovation through SAP S/4HANA implementation, cloud solutions and data analytics. The session emphasized the strategic role of technology in solving business challenges, optimizing global operations and advancing sustainability goals, while creating meaningful career paths for aspiring ICT professionals.
